Registration	Keynote Presentation	Poster 'Datablitz'	Coffee and Poster Viewings	Short Oral Presentations	CEP Awards	Lunch

Keynote Overview

Medical education faces modern challenges, including over-assessment, increasing workloads, financial pressures, and the incorporation of Generative Artificial Intelligence technologies. This talk will reflect on the past 2 years, examine educators' responses, and draw on research into students' perspectives on GenAI in Higher Education. There will be discussions on the balance of change and continuity in medical education and its implications for the future.
